

Suvadra shrestha

Full Stack Developer

Lalitpur , Imadol • +977 9761684581 • jeenashrestha04gmail.com

 @ github.com/suvadrashrestha  @ linkedin.com/in/suvadrashrestha

I'm an developer with internship experience working on real-world projects that enhanced my understanding of server-side development and databases. I have a strong interest in backend systems and a growing curiosity about artificial intelligence and its practical applications. I'm eager to learn, improve my skills, and contribute to meaningful projects. I'm looking for opportunities where I can grow, collaborate with a supportive team, and deepen my expertise in backend development and AI.

SKILLS

Node.js, Express.js, Restful API Design, GitHub, Database NOSQL and SQL, React, Redux Toolkit, Typescript, Tailwind Css

EXPERIENCE

Full-Stack Developer Internship

Kathmandu, Basundhara

Upchaar Nepal

June, 2025 – Nov

I learned Node.js, Express, React and tanStack while exploring how modern web applications are built. This helped me gain practical skills in backend and frontend development and improve my understanding of building responsive and efficient apps.

React developer Internship

Lalitpur, imadol

Alpinist studios

Sep, 2024 - Dec, 2024

Explore market needs, teamwork, and personal growth beyond Typescript and databases. Understand teamwork dynamics, including leadership. Also, delve into React development to improve.

EDUCATION

BCA

Lalitpur

Nepal Mega College (TU)

Apr, 2022 - Present

PROJECTS

ConnectAll | social media platform

Developed a feature-rich social media platform, *Connect-All*, enabling users to share posts, connect with others through follow, engage through likes and comments, and manage their profiles enhancing user interaction and community engagement.

Login System API | Django

Developed a user-friendly login system API using Node.js and JWT for secure user authentication, registration, and token-based access control ensuring protected and scalable user login functionality.

Login System API | Node.js

Built a secure and scalable user authentication API using Django and JWT, supporting features like registration, login, and token-based access control to ensure reliable user management.
